  2013 - 2015

Profile

I am an enthusiastic and detail-oriented software engineer looking for an entry-level position with a company where I can use my coding skills, solve complex problems, and help complete projects on time. I am eager to learn and curious ! During my free time I love discover new things.

My last project

THE MOVIE DB API APP

April 2023

Implemented the movie db API with Next.js and Tailwind css. Hosted on Github & deployed with Vercel.

Experiences

BUS & TRAMWAY DRIVER
TaM, Montpellier FR
(2018 - 2021)

- Maintained meticulous focus and situational awareness of conditions on tramway networks
- Reported defects to engineers and management immediately to minimise delays
- Exchanged information and updates with other drivers to maintain cohesive services.
